With over 50% of all web traffic coming from a mobile device, creating a mobile-friendly website is no longer optional: it's a necessity. It all starts with responsive web design. Responsive web design allows your website to adapt to and provide an optimal experience on any device it's being viewed from. This means that your website will look great and function flawlessly for a user on a desktop computer, laptop, tablet, or smartphone.

Every website developed by JGWD Solutions utilizes responsive web design, adapting perfectly to each device users are accessing it from.

Responsive Web Designs

President's Message

JGWD Solutions is here to **HELP** you succeed.

Hello colleagues,

February is the time that we celebrate Black History which honors African American people's rich range of experiences, struggles and achievements throughout history and into the modern day, so for this edition I would like to quote Martin Luther King, Jr. "I refuse to accept the view that mankind is so tragically bound to the starless midnight of racism and war that the bright daybreak of peace and brotherhood can never become a reality.... I believe that unarmed truth and unconditional love will have the final word."

—*Martin Luther King, Jr.*

If you have ever considered having a web presence **NOW** is the time.

Read this quarters newsletter and learn more about JGWD Solutions.

****Make sure to check our DISCOUNTS****

Sincerely,
Joseph A Gueste, MBA
President, CEO
